

READY Eco-Glass

With recycled glass, so
you're doing the right
thing by our environment

Allied
Concrete
make hard easy

READY Eco-Glass

As part of Allied Concrete's ongoing commitment to providing sustainable, technical READY solutions we're incorporating recycled glass in our concrete. This glass replaces some of the sand we use and doesn't compromise quality, consistency or the environment.

You'll get a great product and you know that you're doing the right thing for our environment at the same time!

Waste glass - and you

Managing large amounts of waste glass has become a major problem for many local councils and it's costly for ratepayers! Allied Concrete worked hard to find a solution to, at least part, of the problem.

We were granted Ministry for the Environment funding to convert some of our plants to use recycled waste glass. Our process will ensure that costs are minimised so the sustainable product is affordable for everyone.

READY Eco-Glass is suitable for residential applications including house slabs, driveways and paths.

This product is currently available in Auckland, Wellington, Nelson, Wanaka, Cromwell and Invercargill and we plan to take it nationwide.

Ask your Allied Concrete representative if READY Eco-Glass is available in your area.
